

Shubham Jha

GitHub — LinkedIn — LeetCode — Codeforces

Education: B.E. in Information Technology, Vivekanand Education Society's Institute of Technology (2022–Present), CGPA: 9.43 / 10

Experience

Associate Software Development Engineer

Jun 2026 – Present

CarTrade Tech — CarWale

React, ASP.NET Core

- Work with engineering teams across **Agile sprints** to maintain and develop features for the CarWale website.
- Contribute to **full-stack development** across React-based frontend applications and ASP.NET Core backend services.

Projects

Interactive Engineering Portfolio | *React, TypeScript, Tailwind, Radix UI, Node.js*

Live — GitHub

- Engineered a high-performance **Canvas starfield and constellation renderer** using vector physics and a custom hook optimized for mobile performance.
- Designed a **useDrag hook** to separate drag/click intent and resolve Radix UI pointer conflicts; deployed cached **serverless middleware** for GitHub/DSA metrics.

Secure Browser-Based HD Web3 Wallet | *React, TypeScript, Web Crypto API, Next.js*

Live — GitHub

- Built a client-side **HD Web3 wallet** supporting seed generation, import, and multi-account management with controlled state propagation.
- Implemented **AES-GCM/PBKDF2 encryption** with on-demand decryption and a **Next.js serverless backend** for secure multi-chain API access across Ethereum and Solana.

Used Car Portal | *React, Redux, ASP.NET Core, C#, gRPC, Dapper, MySQL*

Frontend — Backend

- Built a **React SPA** for used-car discovery with multi-criteria filtering, URL/localStorage persistence, infinite scrolling, and debounced API requests.
- Designed a layered **ASP.NET Core backend** with API, BAL, DAL, and gRPC layers, implementing filtering, sorting, and pagination over MySQL data.
- Implemented **Dapper data access, Mapperly mapping, centralized exception handling**, and unit-tested frontend and backend business logic.

Micrograd Engine | *Python, OOP, Neural Networks*

GitHub

- Reimplemented a minimal **automatic differentiation engine** using computation graphs and manual forward/backward propagation to understand backpropagation.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, C#, SQL

Frameworks: React, Next.js, ASP.NET Core, Node.js, Express, Tailwind

Backend & APIs: gRPC, Dapper, REST APIs, Serverless Functions

Databases: MySQL, MongoDB, PostgreSQL

Leadership / Extracurricular

CSI, VESIT — Operations Officer

Nov 2023 – May 2025

- Conducted DSA mentorship sessions for 100+ juniors.

Achievements

Competitive Programming: Codeforces 1250+, LeetCode 1900+, 900+ problems solved.

Winner, Genesis Hackathon among 500+ registrations for innovative technical solutions.

Winner, Invictus Hackathon among **150+** teams.

Winner Campus to Corporate (conducted by ISTE VESIT).

Second Runner-Up in the Coding Ninjas DSA Contest (150+ participants).

Winner, AI Council College Ideathon.
